"Nature is my religion and the earth is my temple"

My paintings express my infinite admiration for the diversity of colour, form and textures of the nature world. This is something I want to share with everyone who is ready to see it.

I profoundly enjoy perceiving and contemplating ordinary and unusual behaviour of all animals. I dedicate each moment of my time to integrate myself into that space. Each painting, every single brush stroke, is an expression of my love and passion. It comes from deep within, it is a meditative process as I get lost in reliving the experience and watch it come to life on canvas.

I combine realistic ideas with metaphorical elements in a mixture of recognizable subjects and an imaginary world which add a spiritual component to the final artwork. My artworks are inspired by some of the most spectacular visual images on the planet that have not only aesthetic impact on the viewer, but can also trigger emotions and important questions.

'Forest Mystery' acrylic

When you love something you naturally want to protect it so I would like my art to be a window into a world not everyone has the opportunity to see. My goal is to capture and preserve unique habitats and scenes, exquisite moments and create a visual depiction of the natural world - an endangered world which sadly may not be here in the future.
